

## **Alhaline TV Wall Mount FAQ's**

### **Do Alhaline TV wall mounts match VESA or Universal mounting standards?**

Yes! Alhaline mounts are universal by design, meaning the brackets featured on many mounts are easy to install and designed to fit virtually any LCD or plasma TV.

### **What is VESA?**

VESA stands for the Video Electronics Standards Association, an international non-profit organization that develops interface standards for the Consumer Electronics, Display and PC industries. In the TV mounting world, VESA promotes standards for the hole patterns on the back of TVs so they fit with the hole patterns of TV mounts. For more information on VESA visit [www.vesa.org](http://www.vesa.org).

### **What are VESA mounting patterns?**

VESA 75 x 75, 100 x 100, 200 x 100, 200 x 200, 400 x 200 etc. are all common TV mounting patterns. The numbers refer to the distance between the mounting holes, measured in mm. For example, in a 75 x 75 mounting pattern the holes are 75 mm apart.

### **Do Alhaline mounts have a safety rating?**

Yes! All Alhaline mounts have passed rigorous weight capacity and angle hanging testing to receive the nationally recognized safety listing from Underwriters Laboratories.
